

Pneumatic Angle Turbine Grinder GTG25

When it comes to power, performance and ergonomics, the Angle Pneumatic Turbine Grinder GTG25 sets the standard. More efficient than a conventional vane grinder motor, the tool is powered by cutting-edge turbine technology that provides unmatched material removal capabilities on the roughest surface. The speed governor ensures optimum speed and the process time is cut to a minimum. The Angle Turbine Grinder GTG25 is packed with features that enhance operator comfort while optimizing process speed. Since the job is done faster, the total energy consumption is significantly lower.

Features

- High power-to-weight ratio
- Advanced 2-stage turbine motor
- Ergonomic design
- Precise speed governor
- Autobalancer
- Built-in spindle lock
- Safety trigger
- Overspeed shut-off device

Benefits

- Highest material removal rate in its class
- Oil free operation
- Minimum sound levels
- Reduced risk of vibration related injuries
- Great operator comfort for easy handling

Product Data

Model	Ordering No.	Model type	Model type	Motor type	Max free speed (r/min)	Max wheel dia (mm)	Max pad dia (mm)	Max output (kW)	Max output (hp)	Max working pressure (bar)	Air consumption at free speed (l/s)	Air consumption at max output (l/s)	Air inlet thread BSP size (in)	Rec hose size (mm)	Weight (kg)	Height (mm)
